The world's population age 65 and older is growing by an unprecedented 800,000 people a month, according to a report, An Aging World: 2001, predicted that this phenomenon of global aging will continue well into the 21st century, with the numbers and proportions of older people to rise in both developed and developing worlds. Between 1980 and 2020, it is anticipated that the elderly will increase numerically and as a percentage of total population in Korea, where the ratio of the elderly head count will 14% and over. The United States also will experience a relatively increase in the number of people age 65+, projections indicate that by 2030 there will be more people over age 65 than under age 14.

On the other hand, about 60% of the elderly have low physical and mental level almost close to disabled people. Among them, according to a recent survey, one third report a problem with their vision. Normal and pathological vision changes for elderly provide a challenge for the design of environments.

1.2. The me

The recent between design emotional well-being are influenced by six major environmental factors: light, color, sound, aroma, texture, and space. These have such an enormous physiological and psychological impact on the individual that a well-designed facility properly applying these factors can be considered good medicine in itself. It has been demonstrated that color strongly influences not only human emotions but also

2. METHOD

2.1. Methodology of Analysis

(1) Samples

Total numbers of samples this research examined were 20 in Korea and the United States. Sampling was done through a preliminary examination over Internet portal sites.

<Table 1> Selected Samples

	Facility	Province	City		Facility	State	City
K	A: La vie D'or B: Hain Yoyang-won	Kyunggi	Hwasung	U	A: Rosewood, Estate	MN	Roseville
O	C: Pyungan ei Gyp	Kyunggi	Pyuntaik	S	B: Jones Harrison, Residence	MN	Minneapolis
R	D:	Kyunggi	Icheon	A	C: Seabury	MN	Saint Paul
E	Incheon Youngrak-won		Incheon		D: Damenik's, Care Home	CA	San Francisco
A	E: Youngrak Yo yang ei Gyp		Incheon		E: Saratoga Retirement Community	CA	San Francisco
	F: Seoul Seniors' Tower	Kyunggi	Seoul		F: Jeanne Juan, Residence		Washington D.C.
	G: Lodem Silvertel		Osan				Washington D.C.

(2) Procedures

Data were collected by visiting the each facilities from February through August 2003.

2.2. Aesthetic Measure

The American facilities "D" and "I" are small-scale facilities consisting of less than 15 beds, emphasizing their home-like environment.

The facility "D" therefore uses the monotonous color combination of white and related colors.

3. CONCLUSION

3.1. Color Trend and Harmony by areas

(1) Lobbies

In case of the lobbies of Korean facilities, the dominant colors were concentrated between the P(Purple) and B(Blue) groups.

(2) Hallways

The dominant colors in the hallways of Korean facilities were as follows: PB was used in five cases, and P, RP, YR, Y, and G in one case each. For the sub-dominant colors, YR was used only in three cases.
